

# TRANSCENDENT

CONCUSSION RESEARCH PROGRAM

Transforming Research by  
Assessing Neuroinformatics across the Spectrum  
of Concussion by Embedding iNterdisciplinary  
Data-collection to Enable  
Novel Treatments

# Research Goals

---

#1 Establish a world-leading full-spectrum  
concussion data registry

# Research Goals

---

#2 Conduct patient and provider priority trials to improve outcomes

# Research Goals

---

#3 Build a path to precision,  
personalized care

# Research Goals

---

#4 Implement discoveries into concussion clinical care & guidelines

# Research Goals

---

#5 Partner with industry to explore novel diagnostic, prognostic and therapeutic tools

# Novel Assessments and Treatments
